

# BLUEPRINT

## FAQs

- **Can I remove things we don't need?**

Of course, we understand that not every product is for every church. During the initial conversation and proposal stage, a Blueprint representative will help you remove products not needed.

- **Can I add things not on the list?**

We are happy to make additions to your order, but it would be your responsibility to ensure that items function and/or fit properly with the rest of the solution.

- **Can I change brand lines and or equipment models?**

Changing makes and models of products can impact the function of Blueprint solutions. The make and models are set inside of Blueprint solutions to keep cost low and timelines fast. If specific make and models are required, we'd be happy to build a custom PCI solution for you.

- **Can I just get the cases?**

Yes! Blueprint cases can be purchased individually without any additional gear.

- **What size trailer or box truck do I need?**

Once a solution is chosen, we can give you an idea how much space you need and recommended specifications for a trailer or box truck that you would supply.

- **Can I add to my package later, after we launch?**

We would be glad to assist with any additions your team may want to add as you launch and grow your church.

- **How does my solution ship?**

All Blueprint solutions ship flat stack on pallets. All other gear for your project will be shipped unopened and palletized.
